

28 August 2007

To All Team Members, Walco Inc.;

I would like to commend all Walco team members involved in the Allegheny Ludlum Z Mill-25 Left and Main Motor Refurbish Project.

I realize that I only interact with a few of the team members responsible for the successful rework of these motors. I felt it necessary to share the success with all team members and comment that the work done on this project was of the highest quality and accomplished on very tight schedule.

We all understand that projects encounter bumps on the path to success, those bumps are insignificant when the work is done well and the goal is achieved.

As we move onto the Z-22 Right and Main Motor Refurbish I am confident that the Walco team will make certain that Allegheny Ludlum receives top quality service start to finish.

Congratulations.

Respectfully,

Roger D. Deschamps  
Superintendent Maintenance/Engineering  
ATI, Allegheny Ludlum New Bedford  
PRS Division
